INSURANCE REQUIREMENTS

INSURANCE REQUIREMENTS (NO AUTO RISKS)

Vendor shall procure and maintain for the duration of the contract insurance against claims for injuries to persons or damages to property which may arise from or in connection with the vendors' performance under the contract. The cost of such insurance shall be borne by the vendor.

A. MINIMUM SCOPE OF INSURANCE

Coverage shall be at least as broad as:

1. Insurance Services Office Commercial General Liability coverage "Occurrence" Form CG 00 01 (current form approved for use in Louisiana). **"Claims Made" form is unacceptable.**
2. Workers Compensation insurance as required by the Labor Code of the State of Louisiana and Employers Liability insurance.

B. MINIMUM LIMITS OF INSURANCE

Vendor shall maintain limits no less than:

1. Commercial General Liability: \$1,000,000.00 combined single limit per occurrence for bodily injury, personal injury and property damage.
2. Worker's Compensation and Employers Liability: Worker's Compensation Limits as required by the Labor Code of the State of Louisiana and Employers Liability coverage. Exception: Employers Liability to be \$1,000,000.00 when work is to be over water.

Other Party's Professional Liability. The other party shall provide proof of such insurance. Minimum limits of \$1,000,000.00.

C. DEDUCTIBLES AND SELF-INSURED RETENTIONS

Any deductibles or self-insured retentions must be declared to and approved by the Agency. At the option of the Agency, either 1) the insurer shall reduce or eliminate such deductibles or self-insured retentions as respects the Agency, its officers, officials and employees, or 2) the lessee shall procure a bond guaranteeing payment of losses and related investigations, claim administration and defense expenses.

D. OTHER INSURANCE PROVISIONS

The policies are to contain, or be endorsed to contain, the following provisions:

1. General Liability

a. The Agency, its officers, officials, employees and volunteers are to be covered as "additional insureds" as respects: liability arising out of premises owned, occupied or used by the vendor. The coverage shall contain no special limitations on the scope of protection afforded to the Agency, its officers, officials, employees and volunteers.

b. Any failure to comply with reporting provisions of the policies shall not affect coverage provided to the Agency, its officers, officials, employees or volunteers.

c. Coverage shall state that the vendor's insurance shall apply separately to each insured against whom claim is made or suit is brought, except with respect to the limits of the insurer's liability.

2. Worker's Compensation and Employer's Liability Coverage

The insurer shall agree to waive all rights of subrogation against the Agency, its officers, officials, employees and volunteers for losses arising from performance under the contract.

3. All Coverages

Each insurance policy required by this clause shall be endorsed to state that coverage shall not be suspended, voided, canceled, reduced in coverage or in limits except after thirty (30) days' prior written notice by certified mail, return receipt requested, has been given to the Agency.

E. ACCEPTABILITY OF INSURERS

Insurance is to be placed with insurers with a Best's rating of **A-:VI or higher**. This rating requirement may be waived for workers' compensation coverage only.

F. VERIFICATION OF COVERAGE

Vendor shall furnish the University with certificates of insurance affecting coverage required by this clause. The certificates for each insurance policy are to be signed by a person authorized by that insurer to bind coverage on its behalf. The certificates are to be received and approved by the University before work commences. The University reserves the right to require complete, certified copies of all required insurance policies, at any time.

BID BOND

Each Bidder shall furnish a Bid Bond, Cashier's Check or Certified Check made payable to the Board of Supervisors of Louisiana State University and Agricultural and Mechanical College, in the amount of 5 per cent of the total amount of the bid for one year. All bonds must be issued from a surety licensed to conduct business in the State of Louisiana and with a rating of "A: VII" or better in the most current published edition of the AM BEST Insurance Guide.

This Bid Bond, Cashier's Check or Certified Check shall be subject to forfeiture for failure on the part of the successful Contractor to enter into a contract and/or to furnish the required Performance Bond within THIRTY- (30) calendar days after written notice that the instrument is ready for signature, or to commence operation under the contract. The University shall have the right to retain the bond or check of all bidders until either: a) the requirements have been met, performance bond has been furnished, and contract has been executed, or b) the specified time has elapsed so that bids may be withdrawn, or c) all bids have been rejected. Only checks will be returned. Should the bidder refuse to enter into such contract or fail to furnish such bonds, the amount of the bid security shall be forfeited to the University as liquidated damages, not as a penalty.

PERFORMANCE BOND

The University will require the successful Contractor to furnish a Performance Bond, within thirty - (30) calendar days of official written notice (letter of award) in the sum of 100% of the total amount of the bid for one year for the full term of the contract. Bonds shall be made payable to the Board of Supervisors, Louisiana State University and Agricultural and Mechanical College. These bonds must be issued from a surety licensed to conduct business in the State of Louisiana and with a rating of "A: VII" or better in the most current published edition of the AM BEST Insurance Guide.

Note: No other form of Performance Bond will be accepted.

The bond shall secure for the University the prompt and faithful performance of the contract in strict accordance with the Invitation to Bid. The bond shall protect the University and the State of Louisiana against all liens or claims which may be filed against the contract work for any reason and shall provide for the payment of reasonable attorney's fees for the enforcement of the contract and for the institution of any legal proceedings which may become necessary in connection with the contract.

BID #005526

NOTE: TECHNICAL AND/OR SERVICE MANUALS TO ACCOMPANY BID.

NOTE: PLEASE PROVIDE FOUR (4) COPIES OF BID RESPONSE.

COMPREHENSIVE MAINTENANCE PROGRAM GENERAL SPECIFICATIONS

The following specifications apply to all equipment in attachment B unless otherwise specified. All bidders shall submit with their bid a narrative response, detailing their acceptance, rejection, exception, or any other comments for each of the items below. Any questions, comments, or problems regarding this bid will be in writing to the Director of Purchasing, LSUHSC, Shreveport. These questions, comments, or problems must be submitted prior to the bid opening.

1. LSU Health Sciences Center reserves the right to add or delete any item at any time during the contract period. The equipment listed with this invitation to bid will become the responsibility of the contractor on an "as is" basis. Cost for additions will be based on a mutually agreed upon price, but not to exceed 90 % of current service contract retail price. If like equipment, same manufacturer and model is on the equipment list, additions will be made at the existing price. If equipment to be added to the contract does not meet manufacturer's specifications, it will be the responsibility of the medical center to bring the equipment within specifications. Deletions shall be prorated based on the contract cost of the item. Individual line item prices are required.
2. This bid is inclusive of all repair, service, and planned periodic maintenance or inspections (PPM or PMI) and includes all expenses related to labor, travel and parts (including radiographic glassware and nuclear medicine crystals.) Consumables are not included in this proposal. Continuity of equipment repair and maintenance shall be upheld with the date of this agreement and with minimal disruption to patient services. At a minimum, the OEM recommended periodic maintenance, repair, service, and/or periodic maintenance requirements are included with this proposal
3. The contractor shall have forty-five (45) days after the bid is awarded to initiate their on-site program or July 30, 2010, whichever is later, within LSU Health Sciences Center. The contractor must submit a brief report outlining the implementation program for LSU Health Sciences Center. The contractor will identify each item with a unique identity number that will match or correlate with the LSU identifying number. When the contractor is tagging the contracted equipment, the LSUHSC identifier number, if available, will be noted on the worksheets.
4. The contractor shall develop and educate user departments in service strategies that will access the stipulated services of this agreement during the program initiation period. The service strategy shall include, but is not limited to, identification of primary service provider(s), proof of qualifications of service personnel, first call response, impact of repair delays, equipment history profiles, parts inventories, uptime guarantees, report generation, communications channels, duty hours and non-duty hours service telephone number and unique requirements.
5. The contractor shall provide qualified, experienced, and trained personnel to perform equipment repair, maintenance, and inspections, for each piece of contract equipment. Contract service personnel shall be consistent and readily available to fulfill this agreement. The contractor must submit the following for employees that will provide service to LSUHSC, with their bid package:
 - a. Certification or proof of training of assigned personnel, specifying scope of and source of training
 - b. Type of equipment assigned personnel can efficiently and effectively service and repair.

- c. Years of experience in performing both emergency and remedial service with specified equipment.
 - d. Submission of qualifications of personnel providing direct repair and maintenance, if it changes during the contract period.
- 6. The contractor shall provide an OEM or third party service provider, which meets the specification of item 5, at no additional cost to LSUHSC, when the stipulations in Item 5 are not available through the contractor's organization. The plan for meeting item 6 will be submitted with the bid proposal.
- 7. The contractor shall provide replacement parts that are new, of the same quality, and/ or of like kind that shall meet the specifications of parts currently utilized by the user department. The Medical Center reserves the right to specify new OEM replacement parts, when available. If new OEM replacement parts are not available, the contractor may substitute replacement parts with the approval of the Director of Biomedical Engineering. Performance and productivity levels of the parts and service currently experienced shall be utilized as a standard of measure for quality. Any applicable warranty periods, prorated guarantees, or exchange rates shall be upheld by the service provider for all replacement parts, including applicable terms after the expiration date of the contract. The current level of rapid delivery of exchange parts shall be guaranteed.

Under extraordinary circumstances, the successful vendor may, with LSUHC approval, replace a piece of contract equipment with another unit of comparable value. The replacement will have, at a minimum, all of the functions and features of the equipment being replaced.

- 8. The contractor shall perform planned periodic maintenance (PPM) or preventative maintenance inspections (PMI) per manufacturer recommendations and specifications, or as per these contract specifications, and schedule prior to the event with the user department. Additional PPMs or PMIs may be required, if the service records indicate, to achieve optimal equipment performance. Flexible schedules are necessary to minimize conflicts with patient schedules and emergency demands for services in the user department, including provisions of these maintenance calls before or after the traditional hours or in non-peak hours of the department's services. The successful bidder will provide to the using departments and the Director of Biomedical Engineering the annual PM inspection schedule. This schedule will be by month and will list all equipment scheduled for a PM inspection for that month.
- 9. Provisions of priority service shall be guaranteed to LSU Health Sciences Center that will support catastrophic failures or service events that exceed 48 hours. Downtime shall not exceed five (5) working days unless substantial proof is submitted by the contractor outlining unavoidable supply or parts availability circumstances that prohibits timely repair. This proof shall include, but not limited to, parts order documentation, or service requests for other service vendors. The contractor shall be required to provide an on-site, qualified OEM or an OEM approved field engineer or specialist to complete repairs and document operation verification procedures when repairs extend beyond 48 hours and/or recurrent or transient problems persist after repeated repair attempts. The contractor shall submit, during the initiation period, a well-defined technical or service event escalation procedure for repairs that exceed 48 hours or a recurrent or transient problem persists and repeated attempts have been unable to correct the problem(s). Additional downtime limitations on high use or high priority equipment will be found in the Additional Contract Specifications.

10. If the user department requests that an unscheduled repair be performed or completed beyond the listed coverage hours, the contractor will be responsible for what would be the cost of a normal repair, and the using department will be responsible for any normal premium labor charges.
11. The contractor shall maintain an uptime guarantee of 95% per equipment per quarter of the fiscal year that begins July 1, for unplanned repair disruptions and applicable only for the normal coverage hours of the equipment. The hours of coverage, minus holidays, will be used to calculate the uptime percentages. Downtime shall begin when the call is placed to the contractor and ends when the using department verifies that the equipment is fully functional for patient services. 98 % uptime per equipment item per quarter of the fiscal year that begins July 1 will be maintained for the equipment so specified in the "Additional Contract Specifications". Equipment that is in "limited" status for longer than 48 hours will be considered "down" for the entire repair event for the penalty calculations.
12. The contractor shall be imposed a penalty of 10 % of the quarterly contract cost per each percentile point below the standards each quarter that begins July 1 and shall be credited to the next contract invoice period, unless the delay is beyond the contractor's control. The penalties imposed will not exceed the cost of service for the quarter in which the uptime standards were not met as determined by the Medical Center.
13. The contractor shall be required to provide loaner equipment, if available, appropriate for department function and can be reasonably installed for operation, for repairs that require greater than 48 hours or servicing outside the facility. Repairs should, if at all possible, be performed on-site.
14. The contractor shall be required to submit documentation to the user department of quality assurance tests, operation verification procedures, repairs or any regulatory requirements per manufacturer, hospital, or departmental guidelines at the completion of the maintenance or repair event.
15. The contractor shall be required to provide current levels of technical support phone assistance for safe and efficient operation of equipment to identify system errors or access qualified personnel to assist with technical problems. Many user departments require rapid access to technical support phone assistance when patient safety is compromised by technical problems.
16. The successful bidder will not be held responsible for the repair of contract equipment that is damaged due to misuse, or abuse. The successful bidder will be responsible for contract equipment damage that is a result of normal use, patient condition, patient anatomy, resident and intern training, equipment age, and any other reason when reasonable precautions, that follow normal clinical practice, have been taken. The clinical department manager will submit, with the equipment, a statement detailing the events leading to the damage and why the contractor should be responsible for the repair. The contractor's on-site manager and the Director, Biomedical Engineering will review the statement. If an agreement is not reached, the matter will be referred to hospital administration for resolution.
17. The contractor shall be required to maintain an equipment database with all pertinent information concerning repair and maintenance in terms of this agreement and shall supply all necessary hardware and software as required for these purposes. The contractor shall be required to render all hardware, software, databases, and information in both electronic and hard copy in an acceptable format to LSU Health Sciences Center when the contract agreement has ceased or expired.

18. The contractor shall be required to submit periodic reports as defined by Hospital Administration and the user departments concerning maintenance costs, response times, repair times, equipment condition, history analysis, recommendations, completed PMIs or PPMs and associated findings. Also, equipment list of PMI or PPM inspections due the following month, uptime reports, problematic occurrences, and service satisfaction results will be provided. Inclusion of sample reports shall be submitted with response to this bid. The monthly reports will be due by the 10th of the following month, and the quarterly uptime reports will be due, no later than 30 days after the close of the reporting period. The monthly report provided by the contractor will contain:
 - a. The total number of service calls for the previous month
 - b. The number of "unable to duplicate" service calls
 - c. The number of PMI or PPM inspections scheduled
 - d. The number of PMI or PPM inspections completed, for the scheduled month, for the previous month, for the next month (PMI or PPM done 30 days early)
 - e. List of equipment that the PPM or PMI was not completed and why
19. The contractor shall be required to maintain and document compliance with LSU Health Sciences Center guidelines (including Infection Control), compliance with all applicable safety regulations and accreditation pertaining to this bid. The program will meet or exceed all Federal, State, Local, CAP, AABB, and JCAHO requirements. Any requirements not met with regards to the services provided under this agreement by the contractor shall cause the contractor to be liable for the cost of bringing those deficiencies into compliance.
20. The contractor shall be required to cooperate and participate in any applicable accreditation or agency survey and any LSU Health Sciences Center committee or work group.
21. The contractor shall be required to maintain computerized records for warranty repair and/or service events for requested equipment items on or within the database as for those items covered for repair and maintenance. Additional cost pass through will be provided at the time of the request for these services; costs will be based on the contractor's incurred overhead expense for record keeping services rendered.
22. The contractor shall be required to furnish and install OEM provided hardware and software enhancements or updates such as those that improve the ease of use by the user department, required security patches, correct inherent product problems, correct or improve safety requirements, improve diagnostic capabilities for equipment failures or errors at no additional cost to the user department. Hardware or software upgrades that increase the capabilities of the equipment to produce additional tests or functions shall be the responsibility of the Medical Center and will require a purchase order authorized by Hospital Administration.
23. The contractor shall be required to have an on-site manager that shall be selected by mutual agreement by LSU Health Sciences Center and the contractor. LSU Health Sciences Center shall require a minimum of three acceptable resumes to be submitted for selection of the site manager. Five (5) years of clinical asset management experience in the medical field is a desirable qualification. The contractor shall submit a plan for 24 hour, 365 days per year access for both routine and emergency service calls.

24. The contractor shall be solely responsible for provisions of repair, maintenance, diagnostic equipment/tools, and sufficient resources to fulfill the terms of this agreement. A plan must be submitted outlining the necessary provisions of resources to fulfill this agreement.
25. The contractor shall be required to maintain an adequate supply of replacement parts for all equipment serviced. This inventory shall consist of most frequently replaced parts and shall be of sufficient capacity to exceed the uptime agreement. The parts shall be readily accessible the same day as the call for repair. Infrequently replaced parts shall be readily accessible and should not exceed, in most cases, more than an overnight shipment.
26. The contractor shall be accountable for agreements or subsequent financial obligations entered into by the contractor with other service providers in order to fulfill the terms of this agreement.
27. All bidders shall include a response to each item in this specification section.
28. All bidders must submit at least (5) hospital references, similar in size and complexity, and currently receiving similar services as those expected by LSU Health Sciences Center. The references should include a brief statement of the facility size, complexity, scope of service, length of service provision, and the appropriate contact person(s) with title and phone number(s).
29. The base bid includes all repairs, maintenance, and parts, including radiographic glassware and nuclear medicine crystals, as stated in this bid proposal. The Medical Center reserves the right to award the base bid or an alternate bid, whichever it deems in its best interest.
30. All bidders shall respond with one (1) original and four (4) copies.
31. All bidders may schedule on-site visits to review equipment, equipment histories, and other applicable information. For information regarding on-site evaluation of equipment contained in this contract proposal prior to submission of the bid, contact Gerald L. Messina, (318) 675-6333, email: gmessi@lsuhsc.edu.
32. All bidders may bid on the complete inventory or the inventory minus the equipment listed as critical. These equipment items have more stringent maintenance requirements.
33. Monthly billing will be divided into hospital equipment and medical school equipment.
